SUMMARY

GTM engineer building production outbound, enrichment, and CRM automations. At Atlas HXM, replaced the SDR research and sequencing flow for the entire sales rep and AE team, cut enrichment spend about 70% across 10,000+ accounts, and tied inbound automation to $6.38M in attributed pipeline.

EXPERIENCE

Atlas HXM | GTM AI & Automation Manager | Sep 2025 – Present

Chicago, IL / Remote. Production-grade enterprise automations across sales, marketing, finance, legal, and operations for RevOps/growth: 10 AEs, cross-functional managers, directors, VPs, and executive leadership — 59+ employees org-wide.

- **Prospect Automation Engine:** Built CRM-connected account research, enrichment, and human-approved sequencing that replaced the SDR research and sequencing flow for the entire sales rep and AE team; cut research from 8 hours per 50 accounts to under 30 minutes.
- **Clay enrichment and credit governance:** Built a Clay, Python, Amplemarket, ZoomInfo, and HubSpot waterfall with deduplication and spend controls; cut third-party data spend about 70% across 10,000+ accounts; traced a 515K-credit monthly spike to its sources and shipped reusable guardrails.
- **Inbound agent:** Built n8n, Azure OpenAI, Python, and HubSpot intake to classify inquiries, qualify and route leads, and attribute CRM outcomes: 101 MQLs, 29 deals, and $6.38M in pipeline; recovered 364 historical chatbot contacts into attribution with a zero-error API backfill.
- **MQL research agent:** Automated research on all new MQLs.
- **Customer agent:** Deployed a customer-facing HubSpot agent across all website pages that detects true MQLs, provides information, and books meetings directly; paired with a workflow that sends transcripts to n8n to extract contents and enrich records in HubSpot CRM.
- **EOR Compliance Checker (flagship v5):** 46-node n8n workflow screening ~242 pipeline deals against a 30-sector compliance worksheet the moment they enter; deterministic JavaScript rules engine with LLM sector-mapping; corrected 103 deals wrongly stuck in review; 16 unit tests and 238/238 clean writes before go-live.
- **Post-sales call automation:** Connected transcript webhooks, Azure OpenAI, Azure Blob, n8n, and HubSpot to draft follow-ups and capture missed questions, competitors, and next steps in CRM; repaired a pipeline that failed on 21 of 25 runs; cut per-call context bloat from 882KB to 295KB.
- **Pre-sales call automation:** Requested by VP Growth: meeting-booked webhook triggers enrichment (Factors.ai intent, company data) and emails the rep a timed pre-call prep note.
- **Outbound signals & intent engine:** Defined an 8-signal library with a 0–100 account scoring model and composite plays (flagship 'Displacement' play); ran the SDR-agency supply chain: 5,398-contact master with weekly CRM-safe batches.
- **Claude Academy & Center of Excellence:** Ran an internal Claude Academy for the 50+ person GTM org — taught Claude skills, projects, artifacts, Claude Code, and best practices; built 30+ reusable Claude skills/agents, programmatic video tutorials, and a CoE project system that cuts idea → fully-scoped project package from 4–8 hours to under 30 minutes.

Founder, SalesGency & Gency AI (Consulting & Contract Work) | Apr 2023 – Present

SalesGency (salesgency.com) — AI-powered agency for GTM projects. Builds enterprise-grade production automations, agents, and skills for marketing, sales, and operations teams. Example builds:

- **Prospect Automation Engine:** Connected HubSpot to n8n to Clay to Amplemarket for lead generation, enrichment, custom research, and messaging. Cut prospecting from 8 hours per rep per week to 30 minutes and lifted open rates from 17% to 55%. pae-landing.vercel.app

- **Inbound Automation Engine:** Classifies incoming messages to determine true leads, researches the prospect, and follows up with a personalized email and booking request. 100+ MQLs qualified, generating ~$6M in pipeline.
- **HubSpot Customer Agent:** Built and configured for the marketing team, live in production on the company website. Defined agent guidelines, set up custom actions, and connected n8n to extract message transcripts and update the CRM with true MQLs, generating nearly $5M in pipeline.

Six core revenue workflows:

- **01 · Inbound Automation** — Sub-30s speed-to-lead: webhook listener, Clearbit enrichment, LLM ICP scoring, instant round-robin calendar booking.
- **02 · Outbound Automation** — Intent waterfall: hiring and tech-stack intent mining, CRM dedupe shield, multi-provider waterfall, PAS email personalization.
- **03 · Pre-Sales Automation** — 1-page dossiers: triggers 10 minutes before discovery calls; prospect bio, recent news, tech stack, and tailored questions into Slack.
- **04 · Post-Sales Automation** — Transcript AI sync: pulls Gong/Fathom transcripts, extracts BANT criteria, updates CRM deal stage, drafts follow-up emails.
- **05 · Daily Execution** — Rep hygiene and stalled deals: 7:30 AM digest of overdue deal stages, uncontacted demo requests, and ghosting alerts.
- **06 · Daily GTM Report** — Executive pipeline telemetry: 6:00 PM briefing on new pipeline generated, stage conversion, CAC velocity, and burn.

Gency AI (gencyai.com) — general AI-powered agency. Turns any department's SOP into an agent across 8 departments (sales & GTM, marketing, operations, support, finance, HR, data, executive productivity), delivered as buyable packages, hireable agents, or 2-week sprints; powered by 370+ production skills.

Selected client work:

- **Dark Roast Media:** Built HubSpot and Reply.io outbound operations for 60,000 leads; campaigns sent 500 emails/day at a 12% reply rate. Client revenue grew from $1M to $3M ARR during the engagement.
- **Rand McNally (Rand Fleet):** Built an outbound playbook and automation for six reps, tied to approximately $5M in pipeline.
- **Scalytics.io:** Embedded with the founding team of a sovereign AI infrastructure startup; built custom CRM and lead-generation workflows, linking product-usage signals to marketing and outbound via Make.com, Zoho, and HubSpot.
- **LiveBuildAI:** Daily AI briefing product — 100-source RSS pipeline producing top-20 headlines, thematic digest, and a LinkedIn-ready edition every morning at 8am; a second music-industry edition runs on the same engine; about 1,000 LinkedIn newsletter subscribers. Read LiveBuildAI

Uber for Business | Enterprise BDR | Aug 2022 – Jan 2023

Generated $947K+ in gross bookings through enterprise prospecting; averaged 2,000+ emails and 250 dials per week to senior buyers.

Upwork | Senior Enterprise BDR | Oct 2019 – Dec 2021

Ranked in the top 10% of a 60+ person team on quota; developed enterprise talent-use cases with buyers. Earlier: Techstars Chicago, Portfolio Associate (Jul–Oct 2018); DreamItReel, Business Development Lead (Sep 2016–Jan 2018), developed a sales process tied to $2M+ revenue and 40% YoY growth; Omicon Entertainment, Cofounder (Jun 2012–Dec 2015).

PROJECTS

- **Artispreneur** artispreneur.com: Live music-business platform: 41,810-listing directory, AI chat, and a skill marketplace.
- **TrainLola** trainlola.com: AI training app: Supabase backend with 9 tables and signup verified end to end; viral rebuild underway.
- **SalesGency** www.salesgency.com: 55-page agency site documenting the 6 core revenue workflows.

- **Gency AI** gencyai.com: SOP-to-agent agency site: 8 departments, buyable packages, hireable agents, and 2-week sprints.
- **CivicPie** : Civic-tech platform covering all US territories; 100-ZIP regression at 93/93 with zero server errors.
- **Rostr** : Agent runtime platform: 6 live projects on a healthy v1 API.
- **Skill library** skillco.work: 383 production skills with manifests and installable zips in a live library.
- **Artist Daily News** artistdailynews.com: Obituary restore plus daily sync; live.

KEY SKILLS AND WORKFLOWS

Skill showcase: skillco.work — 380+ production skills (AI agent workflows, Clay enrichment waterfalls, CRM automation & attribution, outbound systems, compliance automation).

- **n8n Execution Analyst —** Diagnoses n8n workflow execution failures: error chains, node-level analysis, and fix recommendations. GitHub
- **n8n Engineer —** Builds, debugs, and scales n8n workflows like a systems engineer: MCP server/client setups, error handling, and production rollout; treats n8n as both automation fabric and agent runtime. GitHub
- **HubSpot Import Formatter —** Formats records and pushes them into HubSpot, then builds lists: field mapping, dedupe, and list builds handled in code. GitHub
- **POP — Project Output Planner —** Turns a raw ask into a complete, formatted, end-to-end project output package: PRD, specs, architecture, JTBD, and roadmap before any build starts. GitHub
- **Asana Import Skill —** Imports and organizes work in Asana through full REST API integration: tasks, projects, and project reorganization. GitHub
- **NPAO Priority Framework —** NPAO priority framework plus the 4Ds lifecycle for prioritizing work and running it end to end. GitHub

GTM STACK

CRM & prospecting: HubSpot CRM, Salesforce, Clay, Apollo, Amplemarket, ZoomInfo, Reply.io | **Automation:** n8n, Make.com, webhooks | **Agent frameworks:** LangChain, LangSmith, CrewAI | **AI & cloud:** Azure OpenAI, AWS, GCP, Hermes, OpenClaw/Grokbot | **Build:** Google Antigravity, Cursor, Claude Code, Vercel, Supabase, Python, JavaScript, SQL

EDUCATION & CERTIFICATIONS

St. John’s University, B.S. Economics | AWS Certified AI Practitioner (2025) | AWS Certified Cloud Practitioner (2024–2025)
